

Foundation Specs

Riverside.

This is the file your client gets when they tap your TapDrop QR code. No app, no friction — they point their camera, the page opens, they hit Download. That's it.

PROJECT	ISSUED BY	DOCUMENT
Riverside Residence	Joe Calderón	Foundation Specs • v1.2

– SCOPE

Reinforced concrete spread footings and stem walls supporting a wood-framed two-story residence. Soil bearing capacity assumed at **2,500 psf** per geotech report dated 04/22/2026. All work to comply with IRC 2021 and local Riverside amendments.

– SPECIFICATIONS

CONCRETE STRENGTH (28-DAY)	f'c = 3,000 psi
REINFORCING STEEL	ASTM A615 Grade 60
FOOTING DIMENSIONS	24" W × 12" D, continuous
STEM WALL	8" thick × 36" tall, #4 @ 16" o.c.
ANCHOR BOLTS	5/8" ø × 10", 6'-0" o.c. max
VAPOR BARRIER	10-mil polyethylene, sealed seams
FROST DEPTH	18" minimum below grade

– NOTES

Excavation to be inspected by engineer of record prior to placement of reinforcing steel. Concrete shall be placed in continuous lifts; cold joints to be approved in writing. Cure for minimum 7 days under wet burlap or curing compound (ASTM C309).

"If you can hand someone a business card, you can hand them a file. That's TapDrop."

– WHY THIS WORKS

The QR your client scanned isn't pointing at a placeholder — it pointed at the recipient page that pointed at this file. End to end: **tap** → **page** → **file**, on any phone, no install, no AirDrop, no email attachment limits.
